

# **Waterpower Done Right.**

**Littoral Power Systems, Inc.  
New Bedford MA**

**Introduction**

**March 2024**

# Don't just be part of the problem ...

***"SURE,  
WATERPOWER IS IMPORTANT.  
BUT NOT MUCH GETS DONE..."***

... be THE WHOLE PROBLEM!!

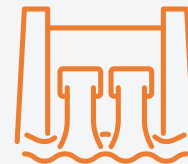

**We develop technologies, design, manufacture and sell products that reduce **time**, **cost** and **risk** of getting waterpower projects built.**

Marine

- current energy conversion
- wave energy conversion

Inland

- head-based hydro
- pumped storage

# Complementary market segments

## head-based hydro:

- mature market, low CAGR
- utility-grade asset all day long
- LCOE very workable
- inexpensive capital
- high current spend
- stiff entrenched competition

## marine energy:

- emerging market, high CAGR
- not yet a utility-grade asset
- LCOE challenges
- capital is expensive
- low current spend
- limited competition, but heating up

# Going to market

**To get customers, you need  
commercial field data. But to get  
commercial field data, you need  
customers.**

**Technical risk is not welcome here!**

# Thank you.
