Independent Power Producer

- **Please circle appropriate description. Your company is:**

regional

national

state

- **Please circle:**

Northwest

West

Southwest

Midwest

Middle Atlantic

Northeast

Southeast

- **How long have you been with your present company?**

I have been with the company for five years.

- **How long have you been in your present position?**

I have been in my present position for five years.

- **Briefly describe the responsibilities of your position and of your department or division as appropriate.**

I represent Brookfield Renewable in D.C., to Congress and the Administration. I am the point person with our national trade associations and coalitions. I also serve as the internal policy representative among the executive leadership of the U.S. company.

- **Your work experience has provided you with an opportunity to develop important skills. As an NHA board of director, particular leadership and management skills are necessary to ensure that the Association receives policy direction and that it stays on course in responding to member's needs. Briefly describe the strengths and / or particular skills you would bring to the Board of Directors.**

The energy industry, hydropower and otherwise, exists and operates because of policy. I have spent the last twenty years working on federal renewable energy policy – legislative as well as regulatory. I think that I while others on the board bring a business knowledge or an engineering background that I don't have, I think I bring a good deal of additional federal policy experience and strategic awareness.

- **Have you been actively involved in NHA over the last several years, served on committees, etc?**

I have served as Vice Chair of the Legislative Committee, as well as a very active participant on that Committee. I have been active in the Deep Dive Policy Team, many ad hoc working groups (e.g., the IRA implementation groups), as well as several years working with NHA on the Uncommon Dialogue.

- **If you are elected to the board, what are the specific priorities that you would pursue?**

I would continue the work on the tax credit proposal for existing hydro facilities and the new 80/20 repowering proposal. I would like to help NHA become even more coordinated with the other renewable energy trades (continuing the work that Malcolm has led on). And I would like to help increase out D.C. advocacy on behalf of the whole industry, including the smaller companies that are not able to have a separate presence or travel here often.

- **Is there anything you would like to add?**

I have been incredibly impressed with my fellow board members and the insights, experience, and hard work that they have given to the association. I've tried my best to contribute at that level and I would do that again (and more) if given another opportunity as a member of the board.
