

Natel is an engineering company specializing in data-driven design of FishSafe turbines.
 We partner with existing turbine manufacturers to realize our designs.

US Existing Hydro

~26 MW
 4.3 m (14') diameter
 ~23 m (75') head
 ~135 cms (4700 cfs) flow

Upgrade 50% of US hydro fleet to high-performance FishSafe designs

Available for fixed pitch, Kaplan and Francis turbines

Retrofit runners with no change to rest of plant & improve passage to >98%
